

like i need u

Keshi

Baby, I call in the dead of night
But you don't need me like I need you
Pray that I won't be alone

Layin' on the bed
Waitin' for your text (Be alone)
Babe, there's nothin' left
Faded I'm a wreck (Be alone)
Afraid what's coming next
Wished we never met (Be alone)
Laying us to rest but
Baby, I beg you (Be alone)

Too soon with a drunk call
In the middle of the night you
Took it, my fault (Be alone)
Didn't really mean to interrupt (Be alone)
But if you change your mind then hit me up (Be alone)

Pain, that's an option
No time for nonsense
Can't ask you nothing
Drank, feeling nauseous
Too many toxins
Not even conscious
Say nothin' more
Say nothin' more, baby

We're better on our own
Tonight I'm getting throwed (You don't need me)
She never coming home
Stay with me (Pray that I won't be alone)
Say you'll leave (You don't need me)
(Be alone)

Pain, that's an option
No time for nonsense
Can't ask you nothing
Drank, feeling nauseous
Too many toxins
Not even conscious
Say nothin' more
Say nothin' more, baby

Baby girl, it's saying
That we just friends, that we just friends
If we fucking are we just friends
Are we just friends?
