

# Say

Keshi

Say it, say it  
You do this all the time  
No sense in holding back tonight  
Can't contain it  
Even if I tried  
Get lost in the moment  
Get lost with you, but I

Can't read your mind  
When all you do is dance on the line  
Can't read your mind  
All I need is a sign

Say the word  
I know what you're thinking, but just say it first  
Been waiting all this time for you to take your turn  
In my arms for a second  
Baby, say the word and I'll be yours

The look you're giving me gives you away  
You finally found the high that you've been chasing  
Only one more choice you gotta make  
I need you to tell me 'cause I

Can't read your mind  
All I need is a sign

Say the word  
I know what you're thinking, but just say it first  
Been waiting all this time for you to take your turn  
In my arms for a second  
Baby, say the word and I'll be yours

So close to your body, can you feel it?  
Come and spend the night with someone new  
Talking with your hands, but do you mean it?  
Baby, all you gotta do is

Say the word  
I know what you're thinking, but just say it first  
Been waiting all this time for you to take your turn  
In my arms for a second  
Baby, say the word and I'll be yours

Say the word  
I know what you're thinking, but just say it first  
Been waiting all this time for you to take your turn  
In my arms for a second  
Baby, say the word and I'll be yours

Say the word  
Say the word  
Say the word
