Keshi

Baby I  
Can't decide I  
Need your guidance

I got nobody left to lose  
When I fall I turn to you  
And the world just got confusing  
And I think you need me too

She want a night out, fucked up, don't know where to find ya  
Drive so fast and we runnin' red lights  
Night out, fucked up, don't know where to find ya  
Shit won't last but I wanna make right

So can we talk for a minute, talk for a minute  
So can we talk for a minute, talk for a minute

Maybe we don't talk enough, talk (baby I)  
Maybe we don't talk enough, talk (can't decide I)  
Maybe we don't talk enough, talk (need your guidance)  
Maybe we don't talk like we used to, like we- like we used to

Talk- enough, talk  
Maybe we don't talk enough talk  
Maybe we don't talk enough talk  
Maybe we don't talk like we used to, like we- like we used to

She got me runnin' round town, I surrender all of me  
Oh my god, I'll give you anything you want  
Maybe I forgot why you left in the first place  
Way too many friends getting close-

Got me runnin' round town, I surrender all of me (got nobody left to lose)

Maybe I forgot why you left in the first place (and the world just go t confusing)  
Way too many friends getting close on your birthday (and I think you need me too)

So can we talk for a minute, talk for a minute  
So can we talk for a minute, talk for a minute
