

# Telescopes

Kevin Garrett

If I would call you on your telephone  
To come over and look through telescopes  
While you'd see stars I'd see an ounce of hope  
'Cause you were coming over on your own  
And oh my dear, I fear I'm falling head  
Over heels until I hit the bed  
But you and me I won't ever regret  
'Cause in the end you fill my space, it's my emptiness

You wanna settle down  
I think that we should talk  
You're gonna knock me out  
And I'll get carried off  
But I'm scared to stop  
'Cause oh, I could see your heartbeat through your teeth  
No, you're not fooling anyone but me

I came across all of the thoughts when we  
Had only met but I bet what's inside of me  
Was always more than just a memory  
'Cause since you stayed, you've been changing everything  
You're always one who likes to push the mess  
You're never scared to ever take a risk, oh  
If I'm your man, why won't you tell him this?  
But phrase, we're just too damn different

You wanna settle down  
I think that we should talk  
You gonna knock me out  
And I'll get carried off  
But I'm scared to stop  
'Cause oh, I could see your heartbeat through your teeth  
No, you're not fooling anyone but me  
Oh, I could see your heartbeat through your teeth  
No, you're not fooling anyone but me

You wanna settle down  
I think that we should talk  
You gonna knock me out  
And I'll get carried off  
But I'm scared to stop  
'Cause oh, I could see your heartbeat through your teeth  
No, you're not fooling anyone but me  
Oh, I could see your heartbeat through your teeth  
No, you're not fooling anyone but me
