

## The Dark Don't Hide It

Kevin Morby

Something held me down it made me make a promise  
That I wouldn't tell if the truth forgets about us  
Saying it now comes easily  
After finding out how you've been using me

At least the dark don't hide it  
At least the dark don't hide it  
At least the dark don't hide it  
At least the dark don't hide it

You only said you wanted friends  
For long enough to get rid of them  
You found the kind you knew would only kill you  
So you surrounded yourself with them

At least the dark don't hide it  
At least the dark don't hide it  
At least the dark don't hide it  
At least the dark don't hide it

Now the world was empty on the day when they made it  
But heaven needed someplace to throw all the shit  
Human hearts and pain should never be separate  
They wouldn't tear themselves apart both trying to fit

At least the dark don't hide it  
At least the dark don't hide it  
At least the dark don't hide it  
At least the dark don't hide it

Now death is gonna hold us up in the mirror  
And say we're so much alike we must be brothers  
See I had a job to do but people like you  
Been doing it for me to one another

At least the dark don't hide it  
At least the dark don't hide it  
At least the dark don't hide it  
At least the dark don't hide it
