

Intro (Last Tango)

Keyshia Cole

Turn, turn, turn, turn my music up
Not tryin' to overdose on your love
Don't wanna be heartbroken no more

They're tryin' to kill me with all this non-sense
But I ain't having it no more
You're the love that reflects in my eyes
But you take it away from me
And constantly we fuck, we fight
We make-up
It seems to be us right now
It's love right now

We fuss, we fuck
We make up
But is this really us right now?
Is this really love?
I don't really wanna leave you

Can we make it?
Can we make it?
Will we make it?
Will we make it?
Do you love me?
Do I love you?

How can we love each other?
And do this to one another
It seems to be us right now

We fuck, we fight
We make-up
It seems to be us right now
It's love right now

We fuss, we fuck
We make up
But is this really us right now?
Is this really love?
I don't really wanna leave you
Love one another
Hurt one another
Fight one another
Love one another
I'm so over this shit you've out me through
The stress I lay on you
Is this really us right now?
Do we love one another?
Is this really us right now?
I wanna be us right now
