

Straight Through My Heart

KeyWest

I couldn't see the things that I've seen
The places I've been with you
My broken heart will never be whole
And now I'll be growing old with you
You made your bed, now you can sleep in it too
I'll be sleeping with you tonight
Never again, know I made my mistakes
I won't be making the same one twice

I wanna lay down, curl up and die
Can't find my way out, lights are too bright
Love let me bleed out, giving up on life
Our help is shot down, you took the shot now
Straight through my heart
Straight through my heart
Straight through my heart
Straight through my heart
Straight through my heart

Is this love that you're feeling for me?
Are you starting to believe your lies?
Like a drug, I roll up my sleeve
And watch you spread your disease inside

I wanna lay down, curl up and die
Can't find my way out, lights are too bright
Love let me bleed out, giving up on life
Our help is shot down, you took the shot now
Straight through my heart
Straight through my heart
Straight through my heart
Straight through my heart
Straight through my heart

She was a woman with no heart
Another victim to the part
She'll be your main killer
Please lighten up my [?]

I wanna lay down, curl up and die
Can't find my way out, lights are too bright
Love let me bleed out, giving up on life
Our help is shot down, you took the shot now
Straight through my heart
Straight through my heart
Straight through my heart
Straight through my heart
Straight through my heart
