

The Message

KeyWest

It's been said
It's been whispered on the wind that love is dead
Or so they say
Don't give up
Let the passion in you sing your words of love
Your words of praise

All your hopes and dreams
Break your silence, break your silence
And tell me how you feel
Trust in me, I will guide your message home

Ride the wave
Fly high above the world and so you'll stage
So don't let them bring you down
See the lights, neon clouds and purple stars are shining bright
It's a heavy head that wears the crown

All your hopes and dreams
Break your silence, break your silence
And tell me how you feel
Trust in me, I will guide your message home

Take your message, I'll take your message
Take your message, I'll take your message (and guide it home)
Take your message (and guide it home)
Take your message (and guide it home)
Take your message
I will guide your message home

I'll take your message home
I'll take your message home
I'll take your message home
I'll take your message home
I'll take your message home
I'll take your message home
I'll take your message home
I'll take your message home
I'll take your message home
I'll take your message home
I'll take your message home
I'll take your message home

All your hopes and dreams
Break your silence, break your silence
Tell me how you feel
Trust in me, I will guide your message
