

Altitude

Khalid

I don't wanna say too much already
But I never felt something quite like this
Deep into the night and my eyes are heavy
Try to turn away but I can't resist
You don't gotta fill my head with lies
Living in the moment 'cause I know what this is
You told me that you'd stay for the night
Left early in the morning like a ghost in the wind

Ooh, it's something 'bout you
Has me over the moon
And if I lose your touch
I don't know what I'd do
The temperature is rising
It's 102
The pressure's getting higher in this altitude

Oh
Think about all the time we have
Oh
Think about all the time we have

2 a.m. on Ocean Drive
Roof is gone, we're so alive
See your face lit by the lights
They can't show me what's inside
So you wanna run away from the unknown?
Know it's hard to save a soul from a broken home
Only hurts me in the end if I miss your call
You're imprinted in my head like a centerfold

Ooh, it's something 'bout you
Has me over the moon
And if I lose your touch
I don't know what I'd do
The temperature is rising
It's 102
And we're just getting lifted, lifted, lifted, lifted (And lifted, and lifted)

Oh
Think about all the time we have (And we're just getting lifted, lifted, lifted, lifted)
Oh
Think about all the time we have (And we're just getting lifted, lifted, lifted, lifted)

And we're just getting lifted, lifted, lifted, lifted
And we're just getting lifted, lifted, lifted, lifted
And we're just getting lifted, lifted, lifted, lifted
And we're just getting lifted, lifted, lifted, lifted
