

Searching for nirvana in a crowded room
Feels like just us two, sweat like a monsoon
Watching how you move
I know what you're doing, you say you wanna
You wanna get high (High)
All the drugs you'd take if I weren't by your side (Take)
I won't let you down, wait till you come down

Counting every breath you take, how'd I get here if it's not fate?
And they say drugs are not your friend
That was the first mistake I made, can't tell what's real or what is fake
And they say drugs are not your friend
They say drugs are not your friend, you take one, now you're in a trance
You feel like you've been born again, only until you're bored again
You take, you take, you take, you take, can't tell what's real or what is fake
Can't tell what's real or what is fake

I know that you're
Cravin' more
You're wantin' more (Oh)
Chasing every dose (Wait till you come down)
I know that you're
Cravin' more
You're wantin' more (Oh)
Chasing every dose (Wait till you come down)

High
Higher, higher, higher, higher
High, high (High)
Higher, higher, higher, higher
High (High)

Counting every breath you take, how'd I get here if it's not fate?
And they say drugs are not your friend
That was the first mistake I made, can't tell what's real or what is fake
And they say drugs are not your friend
Feeling numb, getting high
Counting every breath you take, how'd I get here if it's not fate?
And they say drugs are not your friend
That was the first mistake I made, can't tell what's real or what is fake
And they say drugs are not your friend

I know that you're
Cravin' more
You're wantin' more (Oh)
Chasing every dose (Wait till you come down)
I know that you're
Cravin' more
You're wantin' more (Oh)
Chasing every dose (Wait till you come down)

Wait till you come down
