

Floating Angels

Kidneythieves

In this nightmare, i can see myself
And they're telling me to breathe
Breathe, i need you to breathe
But it felt too good
I didn't want to...

Everything you do, every moment counts
Don't hesitate, don't let ever let the battle down
Forget about the past, it can't help you now
Everything you do, every moment counts

The mountain and the climbing is so high
There's got to be an ending to the fight
Everything is racing through my mind
Will this ever turn around?

Then the floating angels come,
With their fire and their guns,
Then the floating angels come,
Before you have to a chance to run
Chance to run...

Leave it all behind, till the day is changed
Listen to them sing, to what them say (to what they say)
Butting gone, if you can take the pain
Leave it all behind, to see another day
Moving from the dark into the light
Revolution nation over night
Everything is coming into sight
I can't see them... (i can't see them)

Then the floating angels come,
With their fire and their guns,
Then the floating angels come,
Before you have a chance to run

Don't be afraid of this,
Fear is afraid of this
Fear is afraid of this

Then the floating angels come,
With their fire and their guns (i can see them),
Then the floating angels come (i can see them),
Before you have a chance to run

Don't be afraid of this
Fear is afraid of this
Don't be afraid of this
Fear is afraid of this
Guns, you better run

With their fire and their guns, you better run...
