

# Human Touch

## Kids in Glass Houses

The melodrama of our heartbeats  
We can't get enough  
I'm oversharing trauma to a blank screen  
Is anyone up?  
They say that all this loneliness and smoke are deadly  
We can't open up  
We take a breath and let the good ones know  
One for the road  
Happiness is somewhere in a camera roll

You just need a human touch  
Wrap your fingers round my heart  
You just need a human touch  
Come here and die inside my arms

Looks like we finally reached the bottom  
The only way's up  
I know I'd make a lousy locksmith, baby  
I can't open up  
They say it's hard to break old habits, save me  
From fucking it up  
Take a breath and let the good ones know  
Another doom scroll  
To happiness that's hidden in a camera roll

You just need a human touch  
Come in and dance across my heart  
You just need a human touch  
Come here and die inside my arms  
Ooh ooh ooh...

Is all our tenderness forgotten?  
Are we just showing up?  
Let me be your buoy  
When the waters get rough  
They say it's hard to find connection  
Take me back to your love  
Rest my head upon your soul  
Bathed in the glow  
Of happiness that's living in your camera roll

You just need a human touch  
Come in and dance across my heart  
You just need a human touch  
Come here and die inside my arms  
Ooh ooh ooh...

You just need a human touch  
You just need a human touch
