

So won't you break it up in awe
Keep me warm through a cold night
Because I'm crawling on a wire and I've got you in my sights
So won't you tell me what I need to sail away for the winter
Because I can hardly breathe hardly wait oh I need her

Come bail me out
I've been waiting for you

So now I've got to find a place where the walls don't remind me
Because my mind is filling up and your face is all I see
And I've been looking through the leaves to find a way I can know you
Cos I've been gathering up all of the pieces to show you

Come bail me out
I've been waiting for you
Don't fail me now
I've been waiting for you

I must be dreaming
