

I'll Do Anything

Kiefer Sutherland

I've been searching for you all my life
Looked so hard that I went blind
There you were standing in front of me
Right in front of me for all this time

When my world would come undone
I'd call on you to provide
And all those nights I spent laughing
There you were right by my side

I love you just the way you are
No I wouldn't change a thing
And if you'll take me as I am, girl
I'll do anything, I'll do anything

I don't expect that you could love me
Or even see me in this light
But this feelings hit me so strong
This feeling that I cannot fight

I love you just the way you are
No I wouldn't change a thing
If you'll take me as I am
I'll do anything, I'll do anything, I'll do anything

Leaving all I had behind
Just to make you mine

I've been searching for you all my life
Now the truth can't be denied
Perfect angel, take my hand
And together we can make our stand

I love you just the way you are
No, I wouldn't change a thing
And if you'll take me as I am, girl
I'll do anything, I'll do anything, I'll do anything
Yeah, I'll do anything
