

# Open Road

Kiefer Sutherland

Midnight moon, just stay with me  
Like a lighthouse in the sky  
Let these eighteen wheels fly

Woke up this morning in a Motel Five  
The day is dawning, I'm gonna drive  
Through the night  
Down that open road

I asked her where we stood  
She said, "Baby, this ain't no good"  
You made the highway your home  
And I'm just tired of livin' alone"

„So you go your way and I'll go mine  
And maybe someday you'll find  
What you're looking for  
Down that open road“

Well, I've been down this road many times  
And Lord, I've tried to find  
Some peace of heart, some piece of mind  
But this road just winds and winds

There's a crazy lady with high heeled shoes  
She could take away my homesick blues  
Lately, I feel a little crazy too  
Yes I do, ma'am, yes I do

Got a double sleeper, I'm hell on wheels  
So come on sweet thing, show me how your love feels  
On the open road

Down the open road  
Down the open road  
Down the open road  
Down the open road

She don't break down,  
She don't run cold  
She's my heart and soul,  
She's my pot of gold

She's the white lines  
When I'm driving blind  
A hundred more miles  
And she's right on time

Right on time  
Right on time  
Right on time
