

Tectonic

Kiesza

Thought you spared from spells of love
Playing where lioness likes to hunt
Lone wolf wild like the wind you ride
Dance with fire and it may light
It's all you feel when it burns right

Maybe you born to move the earth
But someone was bound to change your world
When earthquakes come the surface breaks
Try to fight it's far too late
All you can do is let it take you away

Your lips come at me with lies
With whispers from your head
But they can't dodge your eyes
When your heart tectonic shifts
The damage is done
It's all over your skin
And you run...
Cuz you know I'm the one
You know I'm the one
You know I'm the one
You know I'm the one

Don't be scared of a brand-new wish
Rivers bend and the current shifts
Like a bear in the winter sleeps
You break the ice - you wake the beast
With a hunger that you can't beat

Your lips come at me with lies
With whispers from your head
But they can't dodge your eyes
When your heart tectonic shifts
The damage is done
It's all over your skin
And you run...
Cuz you know I'm the one
You know I'm the one
You know I'm the one
You know I'm the one

Now that you belong to me
I'm taking you
Into a haze
Now that you belong to me oh
Slip away
In our maze

Your lips come at me with lies
With whispers from your head
But they can't dodge your eyes
When your heart tectonic shifts
The damage is done
It's all over your skin
And you run...
Cuz you know I'm the one

Your lips come at me with lies
With whispers from your head
But they can't dodge your eyes
When your heart tectonic shifts
The damage is done
It's all over your skin
And you run...
Cuz you know I'm the one
You know I'm the one
You know I'm the one
You know I'm the one
