

I'll Build a Tower over You

Kiki Dee

I've been watching so long
You never seem to know which way to turn
But I've seen it in the stones
I'm going to get to you with love to burn

You can't hear me if you try
What I'm saying isn't hard to reason
Ever since you called by
I've been hoping that you would realise

I don't wait and wait forever
Nobody else can do what I can do
It's getting late and I just want to tell you
I'll build a tower over you
I've got the strength to see it through
My heart is big enough for two
I'll build a tower over you

So much can hang on just a word
A casual look that says my point is taken
You can't believe what you might of heard
I hear the sound that love is making

So don't wait and wait forever
Nobody else can do what I can do
It's getting late and I just want to tell you
I'll build a tower over you
I've got the strength to see it through
This heart is big enough for two
I'll build a tower over you

And starting right now
I've made up my mind
What I've got to do
So will you now
It's just a matter of time
Till I get through
I'll build a tower over you
I've got the strength to see it through
This heart is big enough big enough for two
I'll build a tower over you
I'll build a tower over you
I've got the strength to see it through
This heart is big enough big enough for two
I'll build a tower over you
