

All Along

Kiley Dean

In the quiet in the dark
I lost the beating to this heart
What I imagined in my arms
So quickly fell apart

In the valley, it was hard
But I believe that you weren't far
I had to choose
To let you, carry me through

Through the questions and the doubts
And the "I don't know how's" now I see
Through the ups and the downs
You have always been faithful to me

And I know in my bones
That you're close to me
And the winds, as they blow
God, you've steadied me
Oh, the fire can't consume
What you've defended and you'll see through
On my knees, when I was weak you were strong
You've been there all along

God of all my yesterdays
The god who knows the god that saves
There's restoration in your name
You stay the same

And I will trust in you alone
No matter where this road is leading
For I know the plans you have
You've always been faithful to me

And I know in my bones
That you're close to me
And the winds, as they blow
God, you've steadied me
Oh, the fire can't consume
What you've defended and you'll see through
On my knees, when I was weak you were strong
You've been there all along

And I'll trust you, as you lead me
I will follow, I'm believing
You're a father, a good father

And I know in my bones
That you're close to me
And the winds, as they blow
God, you've steadied me
Oh, the fire can't consume
What you've defended and you'll see through
On my knees, when I was weak you were strong
You've been there all along

And I know in my bones

That you're close to me
And the winds, as they blow
God, you've steadied me
Oh, the fire can't consume
What you've defended and you'll see through
On my knees, when I was weak you were strong
You've been there all along
You've been there all along
You've been there all along
