Plagues

Kill The Lights

We're setting fires in the darkness of night
Ignite the torches and start the flame
We are the sickness, we are the plague!

The sound of silence is killing me
I taste your needles and my sins
The nightmares pierce my skin so deep
I swallow hope so I can breathe

Welcome to the broken-hearted screaming alone
Welcome to the life departed searching for home

I burn the picture in my head
I watch the doctors wipe your lips
The smell of morphine takes my breath
You close your eyes and pray for death

You live this nightmare I am drowning in the flood
Surrounded by sight of you I'm sinking in the storm

Welcome to the broken-hearted screaming alone
Welcome to the life departed searching for home

Bury me tear out my soul
Tell me I'm nothing but worthless and bleeding alone
Bury me tear out my soul
Tell me I'm nothing but worthless and bleeding alone

Welcome to the broken-hearted screaming alone
Welcome to the life departed searching for home!
