

Salvation

Kill the Noise

I fall into this darkness that I call my home
I feel touched by an angel I know isn't real
They say God'll come back and free us from this place
And we live till we die, oh its always so... easy

The night where you found me
Take me home

I fall into this darkness that I call my home
I feel touched by an angel I know isn't real
They say God'll come back and free us from this place
And we live till we die, oh its always so... easy
