

I Believe

Killswitch Engage

I Believe

Covering the truth inside us
giving into spite
Self inflicted paranoia hindering our sight

Lose track of what used to drive you to make you feel alive
That part of yourself that gave you the willingness to fight

Some people will say it's part of life
I chose to refuse to let it slide
Finding faith in these dark times
Keeping hope alive

I believe there is hope for better days
I believe we will conquer what we face

Discovering the faith inside us
save us from despair
No matter what this world will tell you
do not live in fear

Learn to let the light guide you
Let go of the pain
You can't kill the passion in me
My devotion remains

I believe there is hope for better days
I believe we will conquer what we face

Come what may the light will guide my way
Come what may I won't be led astray

Do you believe that something can renew your strength
When you find it you stop at nothing
it's in every word you say
So keep the faith

The light will guide my way
I won't be led astray
and nothing will stand in my way

I believe I believe that there is hope
I believe there is hope for better days
