

# CHOICE COWBOY

Kilo Kish

Finally found my way to get out  
Finally found my place from the ground  
This town ain't me I can tell  
It's three strikes and I'm out of there there there

Running running running  
I ain't slept in weeks  
I've been- following that breeze  
I've been- scraping my knees  
I've been- taking that leave  
I've been running running running  
I ain't slept in weeks  
I've been- lost in the streets  
I've been- found by the breeze  
I've been- weak in the knees  
I've been running running running  
Been running running running  
Been running running running

Finally found my way to get out  
Finally found that gold in my mouth  
This place is holding me down  
It's three strikes and I'm out of there there there

Running running running  
I ain't slept in weeks  
I've been- following that breeze  
I've been- scraping my knees  
I've been- taking that leave  
I've been running running running  
I ain't slept in weeks  
I've been- lost in the streets  
I've been- found by the breeze  
I've been- weak in the knees  
I've been running running running  
Been running running running  
Been running running running

Finally found my way to get out  
Finally found my name on the crown  
This town can't keep me around  
It's three strikes and I'm out of here here here

Running running running  
I ain't slept in weeks  
I've been- following that breeze  
I've been- scraping my knees  
I've been- taking that leave  
I've been running running running  
I ain't slept in weeks  
I've been- lost in the streets  
I've been- found by the breeze  
I've been- weak in the knees  
I've been running running running  
Been running running running  
Been running running running
