Tb70

Kilo Kish

There are ten million ways to go
I don't think you even really know
I plan to make your brain explode
And I go so mothafuckin' hard
My head hurts
And I ask God for bread first
Only way you'll win is if you're dead first
Jump headfirst
I- I don't know, but-

You should just throw in the towel and pray
I'm winnin', I'm not sure if you can handle it
Get it loud and crazy or just leave me alone

Hate to break it, life can be so unfair
Checkin' for you at the top but there was no one there
Get it loud and crazy or just leave me alone

Don't worry 'bout me
My shit is super gravy
Now that you're done with me just leave me alone

Don't worry 'bout mine
I'm always right on time
Now that you're done, you see, just leave me alone

Hide and seek
Find out everything
If you just take, take it from me

Hide and seek
Find out everything
If you just take, take it from me
