

A Lil' More Time

Kim Burrell

Its 6:00 in the morning and I can already hear my life is...calling
Calling me to get up and do everything in the world to keep from...falling
Falling in to a funk and making a mess out of what already could be...okay
Of things like work and family, love, relationships, you know, all the basic
s
I need...

Just a little more time - I'm telling you I need
Just a little more time - I really, really need, yeah
Just a little more time - oh, I need yeah!
Just a little more time!

Now that I'm making time for me to get things together and orderly - orderly
!
Orderly enough for me to see exactly where I'm going. Going yeah - ooh, owaa
aaa!
Seems like time makes everything fine, gives meaning to meaningful things in
life
Life can be so sweet! When you can get order and time you need

Just a little more time - I need little more time
Just a little more time - gotta get some things together now
Just a little more time - just need a little more time
Just a little more time!

Just a little more time - I really do believe if I get a little time
Just a little more time - everything's gonna be all right when I get... a li
ttle... a little more time
Just a little more time - I really need a little more time!
Just a little more time! Just a little more time!

Seems - sometimes
It seems like - like
Everything is going - going right
So right - you'll find
One day you'll find you need more - more
More - more
More - more - time!

I gotta have some time to do some great things in life I wanna do
Gotta live my life, gotta live my life in time. Oh I need...

Just a little more time - a little time for me
Just a little more time - a little time for you
Just a little more time - then a little time for them
Just a little more time! Time!

Just a little more time - just a little, a little more time for us
Just a little more time - lil' time, a little more time in the airport
Just a little more time - lil' time, a little more time backstage. Five minu
tes?
Just a little more time - lil' more time

Just a little more time - just a little more time for me. Somebody reach me
my brush
Just a little more time - a little more time for my hair. Where's my makeup?
Just a little more time - a little more time for my eyelashes

Just a little more time - just a little - little - little - little more time
for this

Hey! hey! hey! hey!

Bop bop be dop - bop bop be dop
Bop a do beep bee - bop be do beep bee
Bop a do bop be du!
Bop e do bop a du!
Bop a do bop a du!
Bop a do!
