

Looker

Kim Carnes

A pretty face reflected in a mirror
So perfect in every way
With every move
The picture's getting clearer
She's got it all
She's got it made

But when she smiles
Is she really smilin'
She's the only one who really knows
Emerald eyes so cool
And so inviting--hide the side
She never shows

She's a looker
That's what they say
She's got it all
She's got it made
She's a looker
With a beautiful face
Always on display

The magazines always show her smilin'
So perfect in every way
But in the night
I hear a young girl cryin'
She's got it all
She's got it made

She's a looker
That's what they say
She's got it all
She's got it made
She's a looker
With a beautiful face
Always on display

See the face reflected in a mirror
With every move the picture's getting clearer
She walks into a room
People stop and stare
But she just looks away
As if she didn't care

She's a looker
That's what they say
She's got it all
She's got it made
She's a looker
With a beautiful face
Always on display
