

# One True Lover

Kim Cesarion

Oh oh,

Butterfly kisses, kiss you all the time  
Trace your silhouette all through the night  
I can't help but touch ya, I'm never satisfied  
Only to go deeper, alright  
You do something to me, I just can't describe  
There are thing that get me going out of my mind  
All my seven senses you turn them up to ten  
All over my body, never again

Don't wanna be your friend or your brother  
We know how to touch one another  
When we get under the covers  
You're my one true lover  
Of broken hearts, I've felt the pain  
I know I'll never win again  
When we get under the covers  
You're my one true lover

I made a lot of mistakes the way that people do  
Love the lot of faith on the way to something true  
Some girls got to the doorstep, others turn a key  
Lead you to that other part of me

Don't wanna be your friend or your brother  
We know how to touch one another  
When we get under the covers  
You're my one true lover  
Of broken hearts, I've felt the pain  
I know I'll never win again  
When we get under the covers  
You're my one true lover

All my searchings through (through and through)  
Ended here with you (yeah)  
All my searchings through  
Leaded here with you

Don't wanna be your friend or your brother  
We know how to touch one another  
When we get under the covers  
You're my one true lover  
Of broken hearts, I've felt the pain  
I know I'll never win again  
When we get under the covers  
You're my one true lover

Oh oh
