

# Shine On

Kim Wilde

I believed love was a temple  
Where our prayers were born every day  
Precious dreams, forever sacred  
Now we feel them slipping away  
But here we are

Found ourselves lost in the spaces  
Between the moon and the sun  
Now our world, fragile and naked  
Cries the tears on everyone

So stay with me  
Lay with me  
Feel our love  
Shine on, shine on  
Shine on

Every night a little bit longer  
Every day a battle for two  
Fight against the chemical demons  
Who control the fire in you

So stay with me (oh, stay with me)  
Lay with me (lay with me)  
Feel our love  
Shine on, shine on  
Shine on  
Trust in me (I'll never let you go)  
I'll never leave you (ooh, I'll be right here beside)  
Together we'll  
Shine on, shine on  
Shine on

Be the light in me  
I'll be the light in you

Come back to me (come back darling)  
I never want to say goodbye  
Come back to me (come back to me)  
I just need to see your light shine, oh  
I need to touch your face

Together we'll  
Shine on, shine on  
Shine on

Trust in me (I'll never let you go)  
I'll never leave you (ooh, I'll be right here beside)  
Together we'll  
Shine on, shine on  
Shine on

(I'll never let you go) I'll never let you  
(Ooh, I'll be right here beside)  
Together we'll  
Shine on, shine on
