Light

Kina Grannis

I found a light inside me
That's burning even in the rain
And even when I'm sighing
I know that somehow I'm okay

I found a light, I found a light
Growing in the space between

There is no word to claim it
And thinking only makes it gray
And only in this silence
Have I begun to see the way

I found a light, I found a light
Growing in the space between
Just close your eyes, just close your eyes
Feel it underneath what's seen

When we were young, we had it
We were a part of everything
And maybe it's not lost
And maybe this is all a dream

We had it all, we have it
We had it all, we have it
We had it all, we have it
We had it all, we have it

I found a light, I found a light (we had it all, we have it)
Growing in the space between (we had it all, we have it)
Just close your eyes, just close your eyes (we had it all, we h
ave it)
Feel it underneath what's seen (we had it all, we have it)

We had it all, we have it
We had it all, we have it
We had it all, we have it
We had it all, we have it
