

Watchman

King Charles

I know that we said a love was gone
But the time we spent will never be outdone
Cos you cannot have youth
There's no one like you and there's none like us
Cos there's nothing so true
As the feeling we felt when we were in love

When we were together
And when we were apart
We would never say forever
Cos we're gonna stay young

Funny how we live
Funny how we play the worlds sick games
Funny how we live, funny how we die
Is it all in vain?
When I close my eyes
I have pictures of you like flashes in the dark
And any pain any passions
That would remind me that I was alive

When we were together
And when we were apart
We would sit on our solstice
Stay high stay young
And when the lights go out
And the sky is falling I'll find a way
And when the lights go out
And the sky is falling I'll come for you

All this time, this time away
All this time, this time away

Come now baby
Wait for me on that day
Come now baby
I'll take you away

When we were together

When we were together
And when we were apart
We would never say forever
Cos we're gonna stay young
And when the lights go out
I'll find a way
And when the lights go out
I'll come for you

When we were together
And when we were apart
We would never say forever
Cos we're gonna stay young
And when the lights go out
And the sky is falling I'll find a way
And when the lights go out
And the sky is falling I'll come for you

All this time, this time away
All this time, this time away
