

# Her Design

King Dude

This world's designed with us in mind  
I don't believe in a world  
That would leave anybody behind  
This seems to be, at least to me  
The things that offer [?] indeed

This world's designed with us in mind  
We are just Her little things She loves to death  
She eloquently steals our breath  
In time you'll find  
Everything you've ever held against your chest  
Is what you'll sacrifice to Her design

It's the disease that we get for free  
You don't even have to sign  
A form of right with Her  
She had you at birth  
She'll hold you to death  
For what it's worth

This world's designed with us in mind  
We are just Her little things She loves to death  
She eloquently steals our breath  
In time you'll find  
Everything you've ever held against your chest  
Is what you'lll sacrifice to Her design

This world's designed with us in mind  
We are just Her little things She loves to death  
She eloquently steals our breath  
In time you'll find  
Everything you've ever held against your chest  
Is what you'll sacrifice  
This world's designed with us in mind  
We are just Her little things She loves to death  
She eloquently steals our breath  
In time you'll find  
Everything you've ever held against your chest  
Is what you'll sacrifice to Her design
