Evil Death Roll

King Gizzard & The Lizard Wizard

You started everything
You started killing things
You started severing limbs

Evil death roll
Now

You float and wait for me
Your scales are hard and green
Open your jaw for me

Evil death roll
Now
Evil death roll
Now

The night is young – full of sin
Time to slither away again
I can see our history hanging on a knife

So let's start dueling here
I have nothing to fear
I'm grinning ear to ear

Evil death roll
Now
Evil death roll
Now

The night is young – full of pain
Time to slither away again
I can see our history hanging on a knife
So let's start killing things

You distort the notion of the place
The universe's other face
The speed of light has slowed apace
The universe's other face

What it is
Impossible
Gravity
The universe
Has me
Invisible face

Nonagon infinity opens the door
Nonagon infinity opens the door
Wait for the answer to open the door
Nonagon infinity opens the door
Nonagon infinity opens the door
Nonagon infinity opens the door
Wait for the answer to open the door
Nonagon infinity opens the door
One, two, three, four!

The night is young – full of sin

```
Time to slither away again
You can see our history hanging on a knife

So let's start killing things
'Cos you started everything
And let's start severing limbs

Evil death roll
Now
Evil death roll
```
