Flamethrower

King Gizzard & The Lizard Wizard

Depths of hell
Dragon rise
Death in mind
Smoking eyes
Malice gleam
Dearly guise
Futile to hypothesize
Soul blackened by the dark arts
Strike a fear in mortal hearts
Taketh to the sky with blazing darts
Flame those foolish, lazy fucks

My eyes start to spin
Senses dulled by the original sin
Newfound gasoline
Sing and dance with thee
My new family
The folly of men
The tragedienne
A force of nature
A force of might
Fire on the land and wind in flight
Those who stand before do cower in fright
Oh, fearsome one, thou art terrible sight

Flamethrower
Flame
Thrower
Flame
Throw a flame

Engage the mesolimbic pathway
Stimulate brain reward activates
Burn nerve-numbing hot
Swimming dopamine
Sweet smelling, the flesh melting benzene
Mouthfuls of the black, bubbling fuel
Feel it spray through the lizard's nostrils
Mayday, mayday!
Calling ground control
The space station in a dragon-death-roll

Flamethrower
Flame
Thrower
Flame
Throw a flame
Flamethrower
Flame
Thrower
Flame
Throw a flame

I drink lakes of motor oil
I engulf and I inflame
I disrupt the natural order
I come of wind and I come of cloudburst rain

I am the high priestess
I spew motor spirit breath
I will torch the ISS
The last enemy to be destroyed is death
Fire-pious church-goer
Flamethrower

Oil wells drained of fluids
Underneath stand black gold druids
The dragon turns his gaze above
Releases his breath, a flaming dove
Engines crunch on the ground below
Through its teeth, cleansing lava flows
Gaia set to self-destruct
Flamethrower complacent fucks

Motor spirit. Motor spirit. Motor spirit...
