

ILLdren

King Iso

ILLdren are the individuals who, since their youth, have been labeled sick, you know, not normal, or different, from their doctors, peers, and family. They've chosen to form their own society when outcasted, and band together for the greater good.
ILLdren, you feel me?

I - double L - D - R - E - N

Sittin' in the middle where the dark street end
When I slide through the turf, get the car keys then, let's
Take a look into the eyes of the lost, reachin'
Buckle up, fuck around and make yo heart sink in
When I start speaking, you will all see then that
I am here to represent the
I - double L - D - R - E - N
Sittin' in the middle where the dark street end
When I slide through the turf, get the car keys then, let's
Take a look into the eyes of the lost, reachin'
Buckle up, fuck around and make yo heart sink in
When I start speaking, you will all see then

Straight out the land that the heartbeat in
All the odds leavin' when they got even
Diamonds in the rough jewels you do not see them
Came foot off the gas when the concrete lit
Concentratin' on the doc while inside depends
Drownin' in drugs like a shark eatin'
Every pack that was tossed now can y'all see, then?
Wet 'em up when they start squeezin'
Ridin' wit a Drake, Summer all revenge
'Cause nothin was the same, they was stuck up in the rain
Just freezin' like Lin Kuei Scorpion
Kombatin' with a Mortal bout to pass 'em through the portal
Don't be askin' for a photo like the car we in
Demo's in his Dark Lane while y'all pretend
Crazy like the song Gnarls Barkley did
Fatherless y'all forgive all of 'em how can they?
Too they don't know where their fathers went
Mother was locked up so how could a bond begin?
For the closed off ones there's a laundry list
So when they put quarters inside of the system
Supplying the victims that's dry off the Ism
They Dublin twice like the bomb where you send 'em
If they're DC than Washington
Naw more like Gotham trick
I was selling white girl to Barbie's Ken
Me and my girl like Harvey Dent
Fuckin' Harley Quinn don't start tweakin'
Dogs off the leash bout to hop the fence
Hungry left outside all weekend
The sons and the daughters of the ones who forgot 'em
And these are the same ones who brought me in
(Man who the fuck is you talking 'bout?)

Sittin' intake like the weed while they log me in
She finna strip me naked while she get the information
But she really wanna take it from me balls deep in
Walks me in through the lobby I see all them call it Fall season
'Cause everybody droppin' or levitatin' they dead or medicated when I came up with the zombie shit
I was DeadGang, Ghost Town, whippin wit' the 4 pound
Clappin' like a standing ovation into the whole crowd
Stackin' up the tender in balls but I'mma throw rounds
Y'all arguin' for large audiences with small defenses, not me pimp
I don't battle rap but matter fact the URL that I'll hack
Pull up with the chopper like a battle wax and park 'em like an RV trip
Try to run fuck your back up like tryna put a baby car seat in
Kids packing still Shaq'd up watching people ball like Barkley's friend
'Cause them machines try to measure everything within the system metric lobby
But gods are over men my revolution hurts every RPM
I just hope that y'all got the message
I'll go carpe in y'all DM's
Up at 6 while y'all sleepin'
Wit' the women and the army men
That society, tossed inside of thee, garbage bin it taught me then
That it's apparent since we were kids
The trauma made us adults
The End
