

TFOG

King Iso

Yeah
You know where I'm from, nigga
Yeah

I represent a town full of ghosts
Where the sun won't shine through the clouds and the smoke
Just a bunch of dead people, runnin' 'round with no souls
And that's where I was found, you ain't know?
Sit 'em down, tell 'em so, I represent a town full of ghosts
Where the sun won't shine through the clouds and the smoke
Just a bunch of dead people, runnin' 'round with no souls
And that's where I was found, you ain't know?

The telephone's glitchy, signal really poor revise
The Devil wore dickies and Lucifer wore Levis
True to the core, something that you would ignore, he lies
Even chicks clutchin' Mac-10, you woulda swore was T-Boz
Speakin' of turnin' left, I, see how slick they talk when you dead
Bring 'em back, y'all would have to shoot at Shakur three times
Who woulda thought, rewind (Back)
It's like you gotta hold a gift to know we coexist, truly it's all designed
By the evil that hate us, consumin' us more each time
We consume it like eatin, our view, it destroys the minds
Homeless and still human, but few will ignore each time
Shit, they were transparent before Bruce went to go and decide (What?)
What his will is, I got a sixth sense and a fifth element, truly it's hard when we die
Roamin' the streets at two in the morning, sleep, why?
Ain't no rest for the wicked, that's who we at war wit', but me? I

I represent a town full of ghosts
Where the sun won't shine through the clouds and the smoke
Just a bunch of dead people, runnin' 'round with no souls
And that's where I was found, you ain't know?
Sit 'em down, tell 'em so, I represent a town full of ghosts
Where the sun won't shine through the clouds and the smoke
Just a bunch of dead people, runnin' 'round with no souls
And that's where I was found, you ain't know?

Been wantin' Jimmy since princes, Makaveli 'fore he left Earth
Lektor been a specter interceptin' wit' a sceptre
Yes, nurse? I'm nutty's what was said by the professors
Shoot, dealin' away, I'm too real, I'm investin' in the steppers
You on a bench, not like me, though, I'm pressin' 'til my chest hurt
Could spot you like a leopard, but you never wanna get work
Higher than most, this will get biblical by the next verse
Or an exorcist excerpts who ain't never gave an F-word
I would, wit' migraine pain, but yes, of course my head hurts
Before you medicate us, please bring us back from the dead, first
Was in the ward, eatin' a biscuit, limpin' like Fred Durst
Like God got my back? Is Christ sure? Let me go get hurt
Check with the exerts, left with the vets like pet fur
On how I dropped Get Well Soon, only to get worse
But here I am, I'm packin' everything since birth
Hopin' to help hella people do the same, cause yessir

I represent a town full of ghosts

Where the sun won't shine through the clouds and the smoke
Just a bunch of dead people, runnin' 'round with no souls
And that's where I was found, you ain't know?
Sit 'em down, tell 'em so, I represent a town full of ghosts
Where the sun won't shine through the clouds and the smoke
Just a bunch of dead people, runnin' 'round with no souls
And that's where I was found, you ain't know?

Niggas know where I'm from
It's hella spooky outside, nigga
Ahh, ahh
Niggas know what it is with me
Represent a town full of ghosts
Where the sun won't shine through the clouds and the smoke, nigga
