

**B4U**

**KiNG MALA**

I don't know what you do  
Guess it doesn't feel real when I think it all through  
But I like it

Always thought that I knew  
Always thought that I knew  
Which direction, perfection  
In every little thing that I do

This soul was hollow  
This map was followed  
Before you

The nights were manic  
A constant panic  
Before you  
Yeah you

Think I found a better way  
Think you see me in a new light  
And I watch it melt away  
Thought the sick was gonna stay  
I didn't know  
Any better

Say it again  
Say it again  
I bet you won't

This heart was hollow  
So hard to swallow  
Before you

The nights were cold  
Dark living bold  
Before you  
Yeah

Think I found a better way  
I think you see me in a new light  
And I watch it melt away  
Thought the sick was gonna stay  
I didn't know  
Any better

Yeah you make me want to stay  
In our bed all fucking day  
Yeah you make me wanna lay  
Lay my head down  
Lay my head down

Yeah you make me want to stay  
In our bed all fucking day  
Yeah you make me wanna lay  
Lay my head down

Sat up in the living room

All I really wanna do  
Is be with you  
Alone with you  
You always knew  
You saw right through  
Right through  
Right through
