

## Time in Disguise

Kings of Leon

Blind attraction, chain reaction  
What you have is mine  
Persian ivy running wildly  
Ashes left behind  
Come a little closer, come a little closer  
Closer now to the edge  
Winds are blowing, fires glowing  
Dancing in your head

Grand occasion conversation  
Light the crowded room  
No one knows which way we're going  
But we'll get there soon  
Run from the mountain, poison the fountain  
Just for the peace of mind  
Back of the alley, they seem to rally  
All people of their kind

Close your eyes and what do you see?  
Is it a man or a masked machine?  
Is the world I belong to just a shade of light?  
It's just time in disguise

Congregated late arrival only passing through  
Prairie garden cold and hardened  
Waiting here for you  
So come a little closer, come a little closer  
Closer now to the edge  
Bold distraction taking action  
Going where you're led

Close your eyes and what do you see?  
Is it a man or a masked machine?  
Is the world I belong to just a shade of light?

Come a little closer, come a little close  
Closer now to the edge  
Winds are blowing, fire is glowing  
Dancing in your head

Close your eyes and what do you see?  
Is it a man or a masked machine?  
Is the world I belong to just a shade of light?  
It's just time in disguise

Come a little closer, come a little closer
