

Fade

King's X

One day I'll get older
Then it will be over
Want to live a long life
Like there is no next time

(Who knows how long after today)
I've heard a million stories
Some self-explanatory
But then the words fade into gray
(Life is too short to fade away)
Take from the final pages
Whatever is contagious
Then make it all just fade away

Fade
Fade

Each day I get older
Get a little colder
I don't need to fit in
Like I did way back then

(Who knows how long after today)
I've heard a million stories
Some self-explanatory
But then the words fade into gray
(Life is too short to fade away)
Take from the final pages
Whatever is contagious
Then make it all just fade away

Fade
Fade

(Who knows how long after today)
I've heard a million stories
Some self-explanatory
But then the words fade into gray
(Life is too short to fade away)
Take from the final pages
Whatever is contagious
Then make it all just fade away

Fade
Fade
