

Finished

King's X

You caught my eye
I couldn't take them off you
And I knew
That you felt the same way too

Finished before it started, oh
One look then we parted

I couldn't speak
I felt one with you
I was afraid
What else could I do

Finished before it started, oh
One look then we parted

Love is patient and kind
Bears and believes all things
Some say it's blind
And I can't see a thing

Finished before it started, oh
One look then we parted

Finished before it started
One look then we parted

Finished before it started
One look then we parted

Finished before it started
Finished before it started
