

## Life Going By

King's X

I've seen a wind torn sky  
And I've felt the river cry  
And I've seen the old ones have their say

I've known the constitution  
And I've seen a revolution  
And I've seen the birds all fly away

I've climbed in the back and I've hung from the rack  
And I've died more than once on the way  
And I've sat there in awe and I've seen myself fall  
And I've felt the full light of the day

Oh... my life going by  
Oh... my life going by  
My life going by

I've read confusing fiction  
And lived a contradiction  
And I've wondered where on earth I've been

I've known a love forever  
A truth I couldn't sever  
A chord that flows as free as wind

I've stood on the mountain and drank from the fountain  
And poured it all out on the floor  
Turned my back to the glory and walked the tenth story  
And come back to knock on your door

Oh... my life going by  
Oh... my life going on  
My life going...  
Oh... my life going by  
My life going...  
Oh... my life going by  
My life going by
