

Something Real

Kirstin

Tell me what to do when I roll with it, put my soul in it
Don't mind if I can't keep control of it
Tonight I just wanna play harder, take it all farther
No, we ain't going home, we just got started

'Cause it's electric when I got you on my mind
And there's a difference when you look into my eyes
I never thought that you'd be taking me so high
Oh, so high

All I need is something real
Been searching for a feeling, and that's you
All I need is something real
And now I won't be leaving, without you

Tell me where to be and I'll go, baby
Just let me know, baby
Give me yes, give me no, no, and no maybes
Tonight I just wanna be someone
'Cause I ain't got nothing I've to lose
Say the word, and I'll come running

'Cause it's electric when I got you on my mind
And there's a difference when you look into my eyes
I never thought that you'd be taking me so high
Oh, so high

All I need is something real
Been searching for a feeling, and that's you
All I need is something real
And now I won't be leaving, without you
All I need is something real
Been searching for a feeling, and that's you
All I need is something real
And now I won't be leaving, without you

'Cause it's electric when I got you on my mind
And there's a difference when you look into my eyes
I never thought that you'd be taking me so high
Oh, so high
So high

All I need is something real
Been searching for a feeling, and that's you (something real, yeah)
All I need is something real
And now I won't be leaving, without you (it's you, it's you)
All I need is something real
Been searching for a feeling, and that's you (no)
All I need is something real
And now I won't be leaving, without you
