

I Finally Found My Way

Kiss

So many people tried to help me on my way
So little time and there's still so much left to say
There's no explainin' all the things that I've been through

But I finally found my way to you
I finally found my way to you

Now the day is endin' and the night begins to fall
Sometimes, I wondered if I'd make it back at all
I gave up everything I had and ever knew

But I finally found my way
I finally found my way
I finally found my way to you

Remember, how we used to hide away
We'd share the secrets of our souls
Turned down the lights and dance the night away
We danced the night away
We danced the night away

Remember, how we used to hide away
We danced the night away
We danced the night away

And now I'll hold you like I never have before
I'll let you go just long enough to lock that door
The words, I whisper come so late and overdue

But I finally found my way
I finally found my way
I finally found my way to you
To you baby
