Space Invaders

Kitty in a Casket

From outer space
Across the universe
We crashed into the earth

Here we stand
Shaking hands
With the world´s presidents

But that´s not where we want to be
We wanna be at the cemetery
All we need are your dead ones
cos We are, We are

Space invaders, space invaders
Space invaders, space invaders
The mutant force from outer space
We are digging out your graves
Digging out your grave

You got no idea
Why we are here
Watch out what we will do

Dig out your graves
Make you slaves
And breed the human race

We need corpses to save our lives
That´s the time to say goodbye
We will live and you will die
cos We are, We are
