

You Don't Love Me (But You're Afraid Someone Will)

Kitty Wells

You've always had your way with me
Each time you left my heart felt a chill
But I've only been a past time to you
No you don't love me but you're afraid somebody will

You're afraid someone else will come along who cares
Someone whose love I could share
You've given promises you won't fulfill
No you don't love me but you're afraid somebody will

You've always had your way with me
You never gave my heart love it could feel
The love you give to me is not real
No you don't love me but you're afraid somebody will

You're afraid someone else will come along who cares
Someone whose love I could share
You've given promises you won't fulfill
No you don't love me but you're afraid somebody will
