# Silver Forest

**Klaxons**

Gather round in groups
We're fading like the mist on silver dew
Come dressed in flax blue
And never trouble trouble 'till the trouble troubles you
Earth, wind, sun
Water's run
One, four, five
Bring to life
Those that seem very nice
Others with jewels in their eyes
We're looking to build paradise
By drawing down the moon
They're going to hang the moon
In silver forest where the sun seems twice as bright
You need no ship to sail towards delight
As long as you are harming no one
Come and go and dare to know
You'll dance in circles with defo
The garden will not overgrow
Standing on black ice
In horus eye's monsoon
People often try
To remember how it was when the babble went by
Earth, wind, sun
Water's run
One, four, five
Show us life
Shadows are shared in good time
The stars they are reaching phase five
We're all in our own paradise
They're going to hang the moon
We're drawing down the moon
In silver forest where the sun seems twice as bright
You need no ship to sail towards delight
As long as you are harming no one
Come and go and dare to know
In silver forest on the eve of mischief night
The wilderness is bubbling with delight
As long as you are harming no one
Come and go and dare to know
You'll dance in circles with defo
And everything you wish to know
Will only make the garden grow
