

I've seen the light, I see the light  
I love of what I need, I've got greed  
I've been a sinner for as long as I know  
So help me understand the little that I know  
Shadow dancing with my spirit  
Got to face your demon on your own  
Take my body and put it through the dust  
I've been buried in the crust  
Together now, so help me understand  
The little that I know, together now  
Together now, it's us now, it's us now  
And there's them, and there's them  
And should we start again  
Together now, together now  
It's us now, it's us now  
The descendants of Christ and it's you  
Will you help me I'm confused, what you gonna do  
With the little that I know with the little that I got  
We're together now, we're together, it's us now  
And there's them, and there's them  
And should we start again  
Together now, together now  
It's us now, it's us now  
I've seen the light, I see the light  
I love of what I need, I've got greed
