

## Only Existence v5

Kllo

We spend the night on every little thing, on every worth  
We require every little gleam to be brighter  
Don't see what we've got till it's gone  
And there's no safety net at the end  
We start, we fall, now we're on our own  
Nothing's what it seems, every little thing

You are my only existence, only hope  
You are my only existence, only hope  
My only hope, my only hope

My only blessing in disguise, when what we want doesn't come in  
Did we ever think, ever read it?  
Just to reassure when I'm caught in the wave  
And double everything, every little thing

You are my only existence, my only hope  
You are my only existence, only hope  
You are my only existence, only hope  
My only  
You are my only existence, only hope  
You are my only existence, only hope  
My only hope

Existence, existence, existence, existence  
Existence, existence, existence, existence  
Existence
