

# Rocket Smoke

Klone

Take off through the rocket smoke  
The greatest of my dreamy load

Crossing a blood red sky streaked with dust  
Between the shooting stars  
I'm ready to rush  
Fuel my elation under a meteor shower  
Our climax closer to a burning sun

Let's go higher to shine  
The greatest of my dreamy load  
Soaring over a starry field  
Let's go higher to shine  
And take off through the rocket smoke  
Laying beyond the stratosphere

Leave the ground till we probe  
The depths of our yearning  
We're only passenger  
To the far side of the time  
Spreading straight up  
No return to the earth  
Slicing the air Burning fast Fire lines

Let's go higher to shine  
The greatest of my dreamy load  
Soaring over a starry field  
Let's go higher to shine  
And take off through the rocket smoke  
Laying beyond the stratosphere

Leave the ground till we probe  
The depths of our yearning  
We're only passenger  
To the far side of the time

Soaring over a starry field  
And laying beyond the stratosphere

Let's go higher to shine  
The greatest of my dreamy load  
Soaring over a starry field  
Let's go higher to shine  
And take off through the rocket smoke  
Laying beyond the stratosphere
