

Mission Control

Knox Hamilton

I never made it
But I know what it takes
I'm motivated by your mixed up emotions
Got my statement and I'm reading you slow
So I can understand it fully, appreciate my standing though
Out of this world and right on time

Oh never in my life have I seen the sky light up like this
I'm far away from Earth and I want to know if you exist

Mission Control, do you read me?
Send me my coordinates lately
Mission Control, am I drifting?
Tie me to someone who will love me

Wait, I think I'll have to be longer
Find another reason to breathe this air
And now we made for ourselves
This won't be the last time

Oh never in my life have I seen the sky light up like this
I'm far away from Earth and I want to know if you exist

Mission Control, do you read me?
Send me my coordinates lately
Mission Control, am I drifting?
Tie me to someone who will love me

I knew it when I met you
I'm not the only one who's alone
Find me soon and take me home
I knew it when I saw you
I'm not the only one hanging on
Tie me to someone who will love me

Oh never in my life did I want to see you more than this
And every time you're lost, I wonder if you know you're missed?
I'm reading what I can and I really hope you're watching this
I hope you know that I exist

Mission Control, do you read me?
Send me my coordinates lately
Mission Control, am I drifting?
Tie me to someone who will love me

I knew it when I met you
I'm not the only one who's alone
Find me soon and take me home
I knew it when I saw you
I'm not the only one hanging on
Tie me to someone who will love me

Someone to beam me up
Someone to find my love
Someone to beam me up
Someone to find my love
Someone to beam me up

Someone to find my love
