

# Breathe

Knuckle Puck

If this is what you want, I'll show you what you get  
For taking higher roads with a cooler head  
Instead of weighing outcomes incessantly  
(They go on and on, on and on)  
I wanna follow through, it doesn't matter how  
I wanna breathe the air and not just to let it out  
Instead of playin' off the cuff

Just breathe  
If the world has opened up beneath your feet  
And you're pushing daisies up from underneath  
When all you need is just beyond your reach  
Just don't forget to breathe  
Just breathe

Tough times ahead and that's okay  
Exhale, but don't blow out the flame  
Choked up for lack of better phrase  
Gasping for air

Breathe  
If the world has opened up beneath your feet  
And you're pushing daisies up from underneath  
When all you need is just beyond your reach  
Just don't forget, don't forget to breathe

(Just don't forget to breathe)

Buckle up, 'cause you're gonna feel  
It in the chest, we're due to decompress  
Fill your lungs and hope we're even  
Sport a smile like you don't know what comes next  
Shut me out with all my demons  
But don't ignore the ones in your own head  
Potential power lost in sequence  
To keep it short, I've done more with less  
I'm an individual, all I ever asked for was respect  
Remind me once again to breathe

'Cause the world just opened beneath my feet  
And you're pushing daisies up from underneath  
When all you need is just beyond your reach  
Just don't forget to breathe

If this is what you want  
I'll show you what you get  
For taking higher roads with a cooler head  
Instead of weighing outcomes incessantly  
Just don't forget  
No, don't forget
