

Levitate

Knuckle Puck

It's sad to say I
Blew through 25
More dead than alive
The expectations slide
Cause all I had was
Just filled with watered down
Liquid quick empty promises
And more excuses
Was all I gave you

There used to be demons hanging over me
But now they can't touch me, don't you see me levitating?
We're going up now and you can't look back
If you can't love me, respect the elevation

And when that bright black hole swallows us all
Will you say you saw it coming? Will you say "I told you so"?
We're always told proceed with caution
To avoid the landslide, but I see no stop signs

There used to be demons hanging over me
But now they can't touch me, don't you see me levitating?
We're going up now and you can't look back
If you can't love me, respect the elevation

Didn't know a diamond when I held it in my hand
What I thought was worth more, I'll never understand
Didn't know a diamond when I held it in my hand
What I thought was worth more, I'll never understand

There used to be demons hanging over me
But now they can't touch me, don't you see me levitating?
We're going up now and you can't look back
If you can't love me, respect the elevation
